Introduction to Council Tax South Ribble BC, Leyland Thursday 23rd January 2020

The Lancashire and Cheshire Association recognise that the delivery of high quality professional events is a key requirement for our members. We are pleased to announce that we are holding an Introduction to Council Tax Day on the 23rd January 2020 at the offices of South Ribble Borough Council in Leyland.

With the budget pressures on local authorities it has never been more important for a local authority to maximise its income from sundry debts and miscellaneous income by applying best practice and using the recovery and enforcement powers available to them.

Our seminars are always well subscribed with positive feedback from both delegates and employers. At **£100 per delegate** I believe the event offers excellent value for money; it will of course be delivered to the usual high standards of the Lancashire and Cheshire Association. **The Association continues to offer a FREE place to student members & Apprentices studying thorough the IRRV. We also offer a generous 50% Discount for all individual members of the Institute or Apprentices studying through other organisations.**

The content of the workshop has been specially designed to be relevant to all those advising on or involved in the billing & collection of Council Tax.

Full details and booking form

*****Free Student Places offer extended to include IRRV Apprentices*****

Editors note, Please note I now work at Test Valley BC, I can be contacted at mfisher@testvalley.gov.uk or 01264 368563

The future of Council debt recovery – intelligent data driven collections

At Destin Solutions we have spent the last ten years fine-tuning our data processing and analysis technology using a Councils own data to combine all their debt streams into a single view of the citizen and a single view of business.

Throw into the mix additional third-party data and we can provide financial insights at an individual debtor level so that Councils can decide what action needs to be taken and the likelihood of the debt being collected.

Financial Insight results based on Risk Type

As well as directing debt down a certain route depending on what the initial data analysis uncovers, sophisticated reporting metrics can identify if a certain set of actions result in a higher percentage of debt being recovered. This is powerful stuff, Authorities can use this information to start proactively adapting recovery approaches depending on what the data is telling them.

Contact Destin Solutions now: email peter.haywood@destin.co.uk or call 07811 157738 to find out how we can help you harness the future of council debt collection.

If you want any items included in future newsletters please contact
